

Linear actuator DSZY2-LT (Limit switches)

DSZY2 electric linear actuators are required in a wide variety of applications. Therefore, it is available in six models:

1. DSZY2-STD (Standard)
(for all applications without position feedback)
2. DSZY2-POT
(with potentiometer for absolute position feedback)
3. DSZY2-HS2
(with 2-channel Hall sensor for incremental position feedback)
4. **DSZY2-LT**
(with integrated, adjustable limit switches)
5. DSZY2-LT-POT
6. DSZY2-LT-HS2

Equipped with a trapezoidal screw spindle (ACME screw), it is a durable and robust DC linear drive, thus achieving high self-locking. In addition, mechanical overload protection has been integrated.

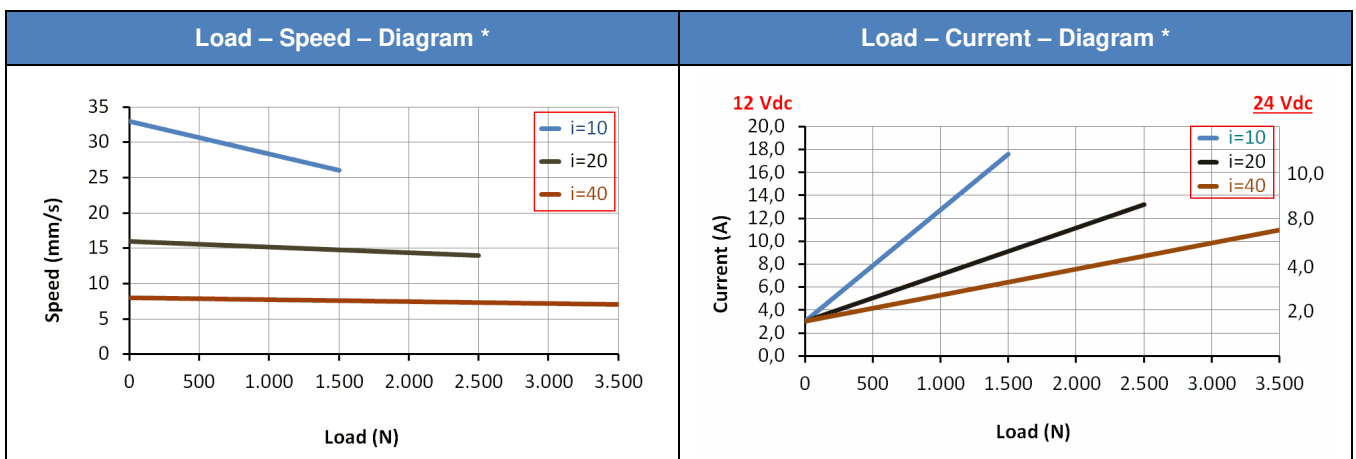

Type code (all options can be combined)

DSZY2	-	12	-	10	-	203	-	LT	-	IP65
Type		Input voltage		Gear reduction i		Stroke		Model		IP Code
		12 Vdc		10		102 mm		LT: integrated, adjustable limit switches (without position feedback)		
		24 Vdc		20		153 mm				
				40		203 mm				
						254 mm				
						305 mm				
						457 mm				
						610 mm				

Performance data: Load – Speed – Current

Gear reduction i	Dynamic load (N)	Static load (N)	Typical speed * (mm/s)		Typical current * (A)			
			minimum load	maximum load	12 Vdc		24 Vdc	
10	1,500	approx. 3,000	33.5	26.7	2.6	1.6	17.6	8.8
20	2,500	approx. 5,000	16.8	14.3	2.6	1.6	13.2	6.6
40	3,500	7,500	8.4	7.5	2.6	1.6	11.0	5.5

(*) Average values

Additional technical specifications

- Thrust and tensile load up to 3,500 N
- Static load up to 4,500 N (at $i=40$)
- Working temperature -25 C° to $+65\text{ C}^\circ$
- Duty cycle 25 % (e.g. 2 min continuous operation – 6 min pause)
- Zinc alloy casing
- Steel outer tube
- IP Code IP65 for all models (in idle state)
- CE - EMV 2014/30/EU (EN 61000-6-3:2007+A1:2011)
- EN -61000-6-1:2007
- IEC 61000-4-2:2008
- IEC 61000-4-3:2006+A1:2007+A2:2100
- IEC 61000-4-8:2009

Dimensions

Dimensions (length) in mm (Tolerance ± 5 mm)							
Stroke (S) ± 3 mm	102	153	203	254	305	457	610
(A) retracted	359	410	460	511	613	765	918
(A+S) extended	461	563	663	765	918	1,222	1,528

Weight

Stroke in mm	Type	102	153	203	254	305	457	610
Weight in kg (incl. packing) approx.	LT	4.9			5.0	6.4		

Pin assignment

Gear reduction i	05 – 10 – 20 – 30 – 40
Red	Red wire to Vdc „+“ and black wire to Vdc „-“:
Black	Piston rod extends

Front and rear connector

Rear connector all Types	Font connector (piston rod) POT, HS2, LT, LT-POT, LT-HS2

Fastening to the gearbox cover

Note: As an example in 0° orientation

The mounting holes on the piston rod and on the gearbox cover are designed in the 0° orientation as standard. Optionally, a different angle (see picture) can be selected for the gearbox cover and piston rod. The angle between the selectable stages is 30° in each case.

Option C1 to C5 is appended to the type code: DSZY2.....-C34
The 1st number stands for the gearbox cover. The 2nd number stands for the piston rod.

Mounting material

Clamp DSZY2/3/5/6/8-H01	Mounting bracket DSZY2/3/5/6/8-H02

Installation instructions

Please note the correct supply voltage as indicated on the electric linear actuator. It must be ensured that the load is not greater than shown in the diagram. To protect against overload, the voltage must be switched off when the maximum current is reached. This can be read in the diagram depending on the selected reduction ratio.

The piston rod is secured against rotation.

In an emergency, the linear actuator is protected by a mechanical overload clutch. The response of this clutch is expressed in a loud rattling tone.

CAUTION: The overload coupling is not designed for continuous use. Instead, it is intended for emergencies, for example, if current monitoring fails. The use of external limit switches is therefore strongly recommended in the standard model.

CAUTION: Please observe the correct wiring for the retraction or extension (see pin assignment in the data sheet).

The load should always be centered in the direction of movement. Transverse forces must be avoided. They always shorten the service life and can impede the function or even destroy the device in extreme cases.

The integrated limit switches can be set by the customer. You can find instructions about this on our homepage. The maximum stroke is always set in the delivery state.
